

FOR NURSE PRACTITIONERS IN INDEPENDENT PRIMARY CARE

Documentation and care operations for the practice you actually run.

Stream is the AI-native platform built for independent primary care — including NP-led practices. The note is just the start: it closes the loop on tasks, referrals, faxes, and follow-up.

WHAT STREAM DOES

- ✓ **Problem-structured notes**
Ambient scribe writes an A&P per problem, not date-organized paragraphs.
- ✓ **Document upload**
Identifies the patient, summarizes content, and extracts tasks to review.
- ✓ **Pre-visit huddle**
Active problems, recent vitals, current meds, and stale issues at a glance.
- ✓ **Longitudinal chart**
Organized around the problems you're actively managing, across time.
- ✓ **Branded referrals**
Referral letters from your chart data, ready to fax or send.
- ✓ **Task management**
Pulled from notes and documents, assigned, and tracked to completion.

A PARTNER OF NNPEN

A 60-day no-cost pilot for NP-led practices

No credit card, no commitment. We set you up, train your team, and you decide at 60 days. Onboarding with a physician — Jake Kantrowitz, MD, PhD.

Talk to a clinician — no pitch, just the product.
